FBQ1: Systematic error can be eliminated to an $\qquad$ .

Answer: *extent*
FBQ2: In an experiment to determine the acceleration due to gravity of a simple pendulum, the measurements needed from the instrument are length of the thread and of oscillation of the pendulum bob
Answer: *time*
FBQ3: The S.I unit of acceleration due to gravity, $g$ is $\qquad$ .

## Answer: ms- $\hat{A}^{2 \star}$

FBQ4: The error due to wear and tear of a particular instrument is called $\qquad$ . Answer: *Back lash error*

FBQ5: Error not due to instrumental problem is $\qquad$ .
Answer: *Observational error*
FBQ6: ___ causes like parallax in reading a voltmeter scale.
Answer: *Faulty observation*
FBQ7: A plotted graph showing a straight line through the origin indicates thatthe two plotted variables are $\qquad$ to each otherÂ
Answer: *directly proportional*
FBQ8: To record the observations during an experiment the measured values would be recorded to at least $\qquad$ decimal places Answer: *two*

FBQ9: If $y$ is plotted on the vertical axis and $x$ on the horizontal axis in equation $y=m x$, the slope is m which is the $\qquad$ value. Answer: *constant*

FBQ10: _are due to causes which can be identified.
Answer: *Systematic error*
FBQ11: In the equation $y=m x+b, m$ and $b$ are $\qquad$ .
Answer: *constants*
FBQ12: When independent measurements are multiplied or divided the $\qquad$ in error in the result is the square root of the sum of squares of fractional errors in individual quantities.
Answer: *fractional error*
FBQ13: The following values 32, 30, 28, 26 have two significant digits except $\qquad$ .
Answer: *30*
FBQ14: In recording the observations in an experiment, the calculated values like reciprocal, square, sine of values would be recorded to at least __ decimal places Answer: *three*

## Click to download more NOUN PQ from NounGeeks.com

FBQ15: The error in the result is found by determining how much change occurs in the result when the maximum error occurs in the $\qquad$ _. Answer: *Data*

FBQ16: Data collected can be used to show $\qquad$ between two physical quantities through graphs. Answer: *relationship*

FBQ17: Which type of motion is executed by a simple pendulum bob?
Answer: *simple harmonic motion*
FBQ18: $\qquad$ is defined as when an object moves to and fro in such a way that its acceleration is directly proportional to its displacement and is always directed to its equilibrium position.
Answer: *simple harmonic motion*
FBQ19: Materials that can regain their original shape after the deformation (change in dimensions) are called $\qquad$ .
Answer: *Elastic materials*
FBQ20: An $\qquad$ is said to perform simple harmonic motion if it moves to and fro in such a way that its acceleration is directly proportional to its displacement and is always directed to its equilibrium position
Answer: *object*
FBQ21: A measurement possessing greater number of significant digits has $\qquad$ accuracy
Answer: *Greater*
FBQ22: At $\qquad$ position of Simple Harmonic Motion (SHM) the displacement of the body is zero.
Answer: *Equilibrium*
FBQ23: What is the unit of the specific latent heat of fusion of ice?
Answer: *Jkg-1*
FBQ24: If a simple pendulum of mass was displaced such that the bob made 20 oscillations in 45.70 seconds. Calculate the period $T$ of oscillation in second. Answer: *2.29*

FBQ25: The period of oscillation is the time taken for the body to make $\qquad$ complete oscillation
Answer: *one*
FBQ26: When a mass is hung on a spring stretches 6 cm , its period of vibration if it is then pulled down a little is $\qquad$ . Answer: *0.5s*

## Click to download more NOUN PQ from NounGeeks.com

FBQ27: A mass ( m ) is hung at the end of a spiral spring of force constant of $200 \mathrm{~N} / \mathrm{m}$. If the spring oscillates with a period of 0.45 s when set in motion, the value of its mass is

## Answer: *1kg*

FBQ28: $\qquad$ can be defined as the ratio of the mass of water to the mass of an equal volume of water.
Answer: *Relative density*
FBQ29: Relative density bottle is also called $\qquad$ gravity bottle. Answer: *specific*

FBQ30: If two values have equal unit of measurement, they are therefore said to be Equally $\qquad$ .

## Answer: *precise*

FBQ31: Glass is an example of $\qquad$ material Answer: *Brittle*

FBQ32: The relationship between any two physical quantities can be determined through the use of $\qquad$ .
Answer: *graph*
FBQ33: Whose law is this â $E^{\circ}$ the force on an elastic material is directly proportional to the extension produced provided that the elastic limit is not exceededấ $\mathrm{T}^{\mathrm{TM}}$ Answer: *Hooke*

FBQ34: If the graph of force $F$ is plotted against the extension e , we shall obtain a $\qquad$ graph showing that Hooke's law is obeyed.
Answer: *linear*
FBQ35: A mass of 40 kg hung on an elastic spring of length 37.2 cm extends to 42.0 cm . The force constant of the spring take $g$ as $10 \mathrm{~ms}^{-} \hat{A}^{2}$ is $\qquad$ .
Answer: *83.33 NmÂ $\hat{A}^{-}{ }^{1 *}$
Multiple Choice Questions (MCQs):
MCQ1: Which of the following measurement done with meter rule is more precise?
Answer: 17.9 cm
MCQ2: Relative error is $\qquad$
Answer: the difference between possible error and the total measurement
MCQ3: The two types of variables that can be measured are $\qquad$ .
Answer: X and Y variables
MCQ4: If two values have equal unit of measurement, they are therefore said to be

MCQ5: The value of acceleration due to gravity depends on one of these: Answer: velocity

MCQ6: The period of the body performing simple harmonic motion is 2 s . If the amplitude of the motion is 3.5 cm , calculate the maximum speed (Ï $€=22 / 7$ ).
Answer: 20.4 cm/s
MCQ7: Which of the following is the best equation of a non-linear graph?
Answer: $y=a x+b x$
MCQ8: Â If the graph produced is a straight line, then the relationship is described as
Answer: Linear
MCQ9: Graphs showing how two physical measurements are related can be represented in which form?
Answer: Variable
MCQ10: If $y=m x+b$, and $y$ is plotted against $x$; what type of graph will be obtained? Answer: horizontal graph

MCQ11: Relative error can be defined as $\qquad$
Answer: product of the possible error to the total measurement
MCQ12: A measurement possessing greater number of significant digits has $\qquad$ Answer: less relative accuracy

MCQ13: The time taken for a given event is 7.4 s and the possible error is 0.05 cm , what is the relative error?
Answer: 0.003
MCQ14: Consider the following pair of measurements 40.0 cm or 8.0 cm . Which one is more accurate?
Answer: 8.0cm
MCQ15: the following physical quantities are fundament quantities except
Answer: Density
MCQ16: Which of the following is correct about types of graph?
Answer: linear graph
MCQ17: Multiplication and division rule states that the product or quotient of two measurements should be rounded off $\qquad$
Answer: to contain less significant digits as the measurement having fewer numbers of significant digits

MCQ18: In measurement report, the non-zero digits are $\qquad$
Answer: not significance

## Click to download more NOUN PQ from NounGeeks.com

MCQ19: If $x$ is equal to 1 in the equation $y=m x$, what will be the value of $y$ ?
Answer: $y=0$
 will be Â
Answer: linear graph
MCQ21: Which of these statements about measurement is correct?
Answer: All measurements are not exact
MCQ22: Multiply the following figures: 5.2865, 3.8 and 19.62 and round off the result to more accurate value
Answer: 394.14
MCQ23: Divide 9.5362 by 3.2 round off the result to more accurate value
Answer: 3.21
MCQ24: Scientific measurements are expressed by using $\qquad$
Answer: rules
MCQ25: The major errors in measuring instrument are
Answer: zero error
MCQ26: Human errors are based on;
Answer: judgement and precision
MCQ27: The possible error in measurement is due to
Answer: imprecision in measuring devices
MCQ28: Precision is a function of $\qquad$
Answer: relative error only
MCQ29: The temperature of two places are recorded to be 30.56 C and 32.22 C we can say that they are $\qquad$
Answer: equally precise
MCQ30: A digit is significant if and only if $\qquad$
Answer: it affects the possible error
MCQ31: Which of the following pair of quantities have identical S I unit?I . Force and surface tensionII. Surface tension and spring constant III. Torque and spring constant IV. Youngâ $€^{\text {TM }}$ s modulus and pressure

Answer: II only
MCQ32: The inverse of the slope of graph of extension against tension in the spring represents $\qquad$ .
Answer: reciprocal of the spring constant
MCQ33: If $m$ and $b$ are constants in the graph of $y=m x+b$. The value of the constant

# Click to download more NOUN PQ from NounGeeks.com 

b represents $\qquad$ .

Answer: intercept on the graph
MCQ34: The following are sources of error in a measuring instrument except $\qquad$ Answer: they arise due to changes in environment

MCQ35: One of the following is not a systematic error. Answer: errors in judgement of an observer
