[ANP512] Sahel savanna vegetation zone houses the following plants except as  
Mitragina

[ANP512] Land on which the vegetation is dominated by  
grasses, grass like plant.  
Grassland

[ANP512] The forage crops bunker and piles should be packed to form progressive  
wedges and maintain a minimum slope of 1 (rise) to 3 (run) to avoid tractor  
rollover.

[ANP512] A modified pedigree breeding method is used to evaluate  
segregating populations each year.  
225 to 275

[ANP512] Which of this statement is not true about principles of forest grazing?  
Livestock grazing can cause advantageous effects, such as increase regeneration of  
desired woody species, excellent soil compaction, or soil erosion on steep, highly  
erodible sites.

[ANP512] cannot be considered as stimulants  
of fermentation that promote rapid pH drop, produce more lactic acid, and reduce  
ammonia production  
Starch

[ANP512] Young growing grasses have a crude protein value of 8-16 percent but most  
matured grasses have 3.5-8 percent

[ANP512] When is the percentage of the climax plant community presently occurring on  
the range site is said to be poor?  
0-25%

[ANP512] A specialization of grazing management that defines systematically recurring  
period of grazing and deferment for 2 or more pastures or management units is  
called Grazing system
