

glucose

[BIO216] Glucose has _____ stereoisomers
16

[BIO216] All these are derivatives of monosaccharides except
maltitol

[BIO216] Which of these can also serve as lubricant due to their viscosity in joint.
Hyaluronic acid

[BIO216] When the aldehyde function of an aldose is oxidized to a carboxylic acid the product is called an _____
aldonic acid.

[BIO216] Which of these disaccharides contains identical monosaccharide units
trehalose

[BIO216] Glucose has _____ chiral centres
4

[BIO216] A phenomenon where a and b anomers of D-glucose interconvert in aqueous solution is known as _____
Mutarotation

[BIO216] Which of these carbohydrates function as antigen determinant of blood group (ABO) system.
fucose

[BIO216] Which of these is a C-2 epimer of glucose?
mannose
