

first law of refraction

[PHY103] As per second law of refraction, ratio of sine of angle of incidence to sine of angle of refraction is a constant

[PHY103] Ratio (speed of light in air or vacuum/speed of light in a medium) is equal to

_____ None of the above

[PHY103] An optical medium where speed of light is slower than another is said to be

_____ optically denser

[PHY103] Reflection depends on object's smoothness

[PHY103] What happens to the image produced by a pinhole camera when you move the back wall farther from the pinhole? It becomes larger and fainter

[PHY103] The shortest mirror in which a creature from outer space can see its entire body is _____ its height.
one half

[PHY103] A ray reflected from a retroreflector travels in the direction opposite that

[PHY103] For each angle of incidence, corresponding value of angle of reflection is same

[PHY103] Bending effect of light as it passes from one transparent material into other is known as refraction
