

nail

[PHY204] Materials that are attracted to a magnet are called magnetic materials

[PHY204] Teflon is used as a material at high frequencies because of its low loss

[PHY204] Which of the following object cannot be lifted by a magnet?
wood

[PHY204] What is the effect of magnetic field on non-magnetic material?
It is very weak

[PHY204] Where is the electrolyte is deposited in an electric capacitor?
Impregnating paper

[PHY204] Which of the following liquid increases breakdown strength of a capacitors
Chlorinated diphenyl

[PHY204] Which of the following materials is used to reduce the size of a film capacitor?
Teflon

[PHY204] Materials that are not attracted to a magnet are called non magnetic materials

[PHY204] The two types of non-magnetic materials are ferromagnetic and paramagnetic materials
