

BIO216

=====

1. The latest Membrane Model is referred to as the

Davson Danielle Model

Nicholson Model

--->> Fluid Mosaic Model

Mosaic Model

2. All but one of these is a major lipid of the membrane

phosphoglycerides

sphingolipids

--->> waxes

cholesterol

3. One of these is not a property of biological membranes

They possess specific recognition sites

--->> They do not allow passage of lipids through them

they have fluidity

they contain electrically charged surface groups

4. A lipid bilayer can close in on itself to form a_____

--->> sialic acid

oligosaccharide

micelle

liposome

5. Which of these has a double ring?

thymine

Whatsapp: 08089722160 or click here for TMA assistance

Practice E-exams & Chat with course mates on [noungeeks.net](#)

thiouracil

cytosine

6. The specific concentration of lipid required for micelle formation is called _____

absolute micelle concentration

--->> critical micelle concentration

focal micelle formation

net micelle concentration

7. One of these is a purine base

--->> adenine

thymine

cytosine

uracil

8. Which of these is a sugar found in nucleosides?

glucose

fructose

mannose

--->> ribose

9. Membranes have all but one of these function

Serve as components of nerve calls

serve as receptors of hormones

--->> controls molecular signals

controls movement of molecules in and out of the cell

10. Which of these Scientist proposed the Mosaic model of membranes

Danielle
