

radiation available on a particular -----
surface

[AGR205] Cloud cover is another climatic element that significantly influences the
penetration of -----
solar radiation

[AGR205] ---- is commonly formed on clear calm nights when rapid radiation reduces
the temperature of the air in contact with the ground
Dew

[AGR205] Precipitation is usually in liquid or ----- form
solid

[AGR205] The altitude of the sun is an important factor which affects the amount of
insolation received at the -----
earth's surface

[AGR205] The common precipitation forms include rain, drizzle, snow, sleet and -----
hail

[AGR205] Continentality is another factor which affects the characteristics of
temperature in ----- and space
time

[AGR205] ----- may be formed by a rapid radiation from ground surfaces at night when
the dew point of the air is below 0°C
Frost

[AGR205] The longer the time of day during which the sun shines, the greater the
quantity of radiation which a given ----- of the earth will be able to receive
portion

[AGR205] Temperatures are particularly higher during summer than during -----
season
winter
