

occurs because alleles are subject to sampling error.  
Genetic drift

[BIO307] One unique feature of Galapagos Islands is that  
The Galapagos Islands have species found in no other part of the world

[BIO307] Which of the following statements is true about genetic drift?  
All of the options

[BIO307] 'Nothing in biology makes sense except in the light of evolution'. This  
statement was made by \_\_\_\_\_  
Theodosius Dobzhansky

[BIO307] How many group of land-bird Finches did Darwin and Mr. Gould identified  
during their exploration to Ecuador?  
13

[BIO307] According to \_\_\_\_\_, populations produce many more offspring than  
can possibly survive on the limited resources generally available  
Thomas Malthus

[BIO307] \_\_\_\_\_ evolution in which different populations of a species become  
reproductively isolated from each other by adapting to different ecological niches and  
eventually become separate specie  
Adaptive radiation

[BIO307] The process by which genetic mutations that enhance reproduction become  
and remain, more common in successive generations of a population is called.  
Natural Selection

[BIO307] Charles Darwin's expediton on board the HMS Beagle in 1831 was to which  
of the following Islands?  
Galapagos
