

Population ecology

[BIO313] What is the limit of tree growth in mountainous regions and high latitudes?
timberline

[BIO313] Which of the sea turtle species, is most associated with tropical waters?
E. imbricata

[BIO313] What is the phase when growth is slow because the population base is small?
Lag

[BIO313] What was the weight of the heaviest hawksbill turtle ever captured ?
127kg

[BIO313] Which of the following is not a general contribution to the fluctuation of a
population size?
distribution

[BIO313] The maximum population abundance an environment can sustain is called?
carrying capacity

[BIO313] When there is little growth because births and deaths are about equal, which
phase is it called?
Stable equilibrium

[BIO313] Which turtle species has been widely regarded as the most abundant in the
world?
olive ridley

[BIO313] What is the number of individuals of a certain species per unit area or volume?
Population density
