

mechanical processes

[BIO408] Soil taxonomy refers to soil classification system

[BIO408] Physical disintegration breaks down rock sequentially. Which is the correct sequence in the formation of soil?  
smaller rocks \_\_\_ sand \_\_\_ silt particles

[BIO408] The activities of soil flora and fauna potentially enhance the following except soil liming

[BIO408] Soil formation is not controlled by soil capacity

[BIO408] Soil forming processes take time to show their effects because time interacts with the other factors of soil formation

[BIO408] An example of metamorphic rock is \_\_\_\_\_ while an example of sedimentary rock is \_\_\_\_\_  
marble; mudstone

[BIO408] Regolith is the layer of loose rock particles that covers the bedrock of land

[BIO408] The Ochricepedon is a mineral horizon that is either too thin, too light in colour, or too low in organic matter to be either a mollic or umbric horizon.

[BIO408] Leaching of soil mineral and erosion of surface soil could be slowed down by natural vegetative cover
