[CHM192] What is the boiling point of mixture of 95 % ethanol -5 % water?
78.1oC

[CHM192] What is the boiling point of ethanol?
78oC - 79 oC

[CHM192] Which of the following is a factor for a successful application of distillation techniques?
temperature

[CHM192] Which of the following is a physical property for the characterization of pure compounds?
boiling point

[CHM192] The third kind of weighing machines invented is?
digital weighing scales

[CHM192] The boiling point of a liquid is a measure of its?
volatility

[CHM192] Which of the following is used for heating above 100oC and up to 200oC?
sand bath

[CHM192] The pressure that the molecules at the surface of the liquid exert against external pressure is called?
vapour pressure

[CHM192] Two major types of distillation are?
fractional and simple distillation
