

indication of purity

[CHM192] The mixture of two compound which has a lower melting point than any other mixture of the two compound is called?  
eutectic mixture

[CHM192] An impure solid melts at?  
lower temperature

[CHM192] Higher boiling point temperature means?  
more energy

[CHM192] The temperature at which sublimation occurs is called?  
sublimation point

[CHM192] Increased in molecular weight increases?  
boiling point

[CHM192] Most melting point are determined as?  
capillary melting point

[CHM192] What happens to a pure solid when the forces of attraction between its particles are the same  
melt sharply

[CHM192] At what melting point range does solid melt sharply?  
0.5 - 1.0 °C

[CHM192] Melting point of a mixture is called?  
mixture melting point
