

PbO<sub>2</sub>

[CHM205] The amorphous form of silica is known as \_\_\_\_\_  
Flint

[CHM205] In the lab, the gas formed by the action of acid and carbonate is called  
CO<sub>2</sub>

[CHM205] Solid carbon IV oxide is known as \_\_\_\_\_  
Dry ice

[CHM205] What is formed when natural gas is burnt in a limited supply of air  
Carbon black

[CHM205] Heating a substance to high temperature in the absence of air is called  
Destructive distillation

[CHM205] Pyrolysis of coal and hardwood in the absence of air gives  
Coke

[CHM205] All these forms of carbon can be manufactured on a large scale except  
Coal

[CHM205] Teflon has \_\_\_\_\_ coefficient of friction  
Very low

[CHM205] What type of carbide is formed when carbon combines with elements of almost equal electronegativity  
Covalent
