

Which of the following is not the classified form of conjugated proteins?
complete proteins

According to solubility and physical properties, classification of proteins include the following except _____
complex protein

What is the IUPAC name of LiAlH_4 _____
lithium tetrahydridoaluminate (III)

One of these statements is a physical property of esters _____
all of the above

Tertiary alcohols are oxidized to _____
none of the above

Peptide bond is a _____
covalent bond

What are the products formed when ether is cleaved with hydro iodoc acid in the cold _____
alcohol and alkyl halide

The boiling point of ethyl alcohol is much higher than that of dimethyl ether with the same molecular weight. Why?
ethyl alcohol shows hydrogen bonding

A tripeptide has _____
3 amino acids and 2 peptide bonds

One of these is not a property of acid anhydrides _____
they are soluble in water
