

## Spectroscopy

[CHM306] X-ray can provide information on the following except  
molecular structure

[CHM306] Ultra violet, visible light, X-ray and radio wave are all examples of  
Electromagnetic wave

[CHM306] Ultra violet, visible light, X-ray and radio wave are all examples of  
Light

[CHM306] One of the following can be analysed by atomic absorption  
spectrophotometer  
Cu ion

[CHM306] One of the following is a representative of rotational spectroscopy  
Raman

[CHM306] One of the following is a representative of vibrational spectroscopy  
Infrared

[CHM306] One of these colours is not a component of visible light  
None of the options

[CHM306] Below 1000 K internal energy is not concerned with the energy associated with  
one of the following  
Translation

[CHM306] One of the following is not connected with Beer-Lambert's law  
Volume
