

change in optical activity of glucose

[CHM315] L-glucose is used for;
research

[CHM315] D-glucitol and D-mannitol are both obtained from;
D-fructose

[CHM315] The configuration of glucose was first given by;
Fischer

[CHM315] Interconversion of monosaccharides is called;
epimerization

[CHM315] Glucose reacts with excess CH_3I and AgOH to give;
pentamethyl ether

[CHM315] D-glucose turns polarized light to;
right

[CHM315] Open chain glucose molecule has ----- chiral centers
4

[CHM315] Oxidation of aldoses to aldonic acids is preferred using
 HOBBr

[CHM315] The sweetest of common natural sugars is;
fructose
