

Slack variable

[CIT756] The optimal solution to a programming problem always occurs at one of three corner points of the \_\_\_\_\_ solution space.  
feasible

[CIT756] In formulating a mathematical model all of these is taken into consideration EXCEPT?  
Statement of Multiple optimum solution

[CIT756] Which of these distributions has its mean is equal to its variance?  
Poisson

[CIT756] Which of these is not considered when replacement of an item is to be undertaken ?  
Colour of the item

[CIT756] Which of these is not a customer behaviour in a queue?  
First-in-first served

[CIT756] Which of these distributions is used in cases where the standard deviation and mean are not equal?  
Erlang

[CIT756] The process of a customer leaving the queue which he had joined and joining another queue to get advantage of being served earlier is called \_\_\_\_\_.  
Jockeying

[CIT756] All these are the properties of Linear programming EXCEPT \_\_\_\_\_.  
Subjective function

[CIT756] A mathematical technique designed to help managers in planning and decision making relative to resource allocations is called?  
Linear programming
