Solution abstractions design

[CIT831] In software engineering, validation means
Checking that the software is what the customer want

[CIT831] In requirement, privacy and safety defines
Legislative requirements

[CIT831] They are all Waterfall Model Problems except;
flexible partitioning of the project into distinct stages makes it difficult to respond to changing customer requirements.

[CIT831] Whicxh of these is a benefit of prototyping?
Improved and increased user involvement

[CIT831] The testing that involve the collections of modules integrated into sub-systems is
Sub-system testing

[CIT831] Which software process does not required sequence of activities with backtracking
Spiral development

[CIT831] Which of these is widely used life-cycle models
Water Fall

[CIT831] Prototyping begins with -------- gathering
requirements

[CIT831] _ is concerned with the theory and fundamentals while ------ is concerned with the practicalities of developing and delivering useful software
Computer Science/ Software Engineering
