Transaction size

[CIT844] ------ notes the rollback of a particular change to the database
Compensation Log Record

[CIT844] Consistency states that only -----data will be written to the database
Valid

[CIT844] Relational database systems typically provide security at two levels: View and -----
Relation

[CIT844] Resources authorization allow the creation new ------
Relations

[CIT844] ----- ensures that the database remains consistent before the start of the transaction and after the transaction is over (whether successful or not)
Consistency

[CIT844] The process of managing/controlling simultaneous operations on the database is known as what?
Concurrency control

[CIT844] ------- is a concurrency control method that assumes that multiple transactions can complete without affecting each other
Optimistic Concurrency Control

[CIT844] If for some reason, a transaction violates the databaseÃ¢â‚¬â„¢s consistency rule, the entire transaction will be
Rolled back

[CIT844] Which one of the options is NOT a for of authorization given to a user on the part of a database
Upgrade authorization
