

Natural causes

[CPT514] High levels of soil phosphorus does the following EXCEPT:
decreases sugar concentration

[CPT514] Senescence is important at the organ level with respect to decreases in the following EXCEPT:
Plant height

[CPT514] Nitrogen negatively affects crop quality in the following ways EXCEPT:
Rust in yam

[CPT514] Measurement through weight of solids or liquids is known as:
Specific gravity

[CPT514] High soil calcium concentrations benefits include all BUT:
increased sugar concentrations

[CPT514] The most common change in fruits and vegetables is the loss of colour

Green

[CPT514] Sites of losses include all the following EXCEPT:
Monetary loss

[CPT514] _____ delays senescence and helps leaves remain green for long period
Cytokinin

[CPT514] Increased soil potassium concentrations have been shown to do all the following BUT:
increase the vitamin D
