enquiry? Scientific Approach

[EDU823] Variables must be identified and defined adequately for their use in the context of research study to guide \_\_\_ Identification of relevant data [EDU823] Which of these definitions of Concepts indicate the precise procedures or operations, to be followed in measuring a concept? Operational definition [EDU823] Which of these variables can be manipulated by the researcher in a research study? Independent variables [EDU823] Which of these research designs are often used by Quantitative researchers to reduce error, bias and extraneous variables? I. Experimental design. II. Experimental design. III. Case Studies. IV. Descriptive design 1 & II [EDU823] The research design and methods to be used in educational research depend on the specific research Question [EDU823] Why are variables identified and defined in the context of a research study? So that necessary data can be identified in preparation for data collection. [EDU823] What is the common name given to terms such as ââ,¬Å"gender, social class, intelligence  $\hat{A}$ ¢ $\hat{a}$ ,  $\neg \hat{A} \square$  in a research study? Variables [EDU823] Which of these describes those conditions beyond the control of a researcher that may place restrictions on the conclusion of the study? The Limitation [EDU823] Which of these roles are performed by effective literature review in in research study?I. familiarizes the researcher with the current state of knowledge in the area. II. researcher to learn how others described similar problems. III. narrow the focus of the research and avoid duplication. IV. avoiding pitfalls by learning from the experience of others. I, II, III & IV
