

the atmosphere as resulting from the growing use of energy and expansion of the
global economy
greenhouse gases

[EHS205] The world meteorological organization describes the build-up of _____ in
the atmosphere as resulting from the growing use of energy and expansion of the
global economy
emission of deadly substance

[EHS205] The net effect of the build-up of greenhouse gases is _____
to warm the Earth's surface

[EHS205] The net effect of the build-up of greenhouse gases is _____
to warm the Earth's surface

[EHS205] Without the greenhouse effect, the planet would be too _____ to support life
cold

[EHS205] _____ generates changes which are Cyclic in nature
Milankovitch effect

[EHS205] _____ generates changes which are Cyclic in nature
Milankovitch effect

[EHS205] The greenhouse gases become globally mixed in the lower part of the
atmosphere called the
Troposphere

[EHS205] The trapping of heat, maintaining the earth's temperature at a level that can
sustain life is known as _____
Greenhouse effect

[EHS205] _____ is an indicator of Climate change in snow temperature
B and C
