

troposphere, stratosphere, mesosphere, and -----  
thermosphere

[ESM343] ----- is the fifth most abundant gas in the atmosphere  
Carbon dioxide

[ESM343] ----- is an instrument that measures humidity  
sundial

[ESM343] Since 1750, methane concentrations in the atmosphere have increased by  
more than ----- %  
150

[ESM343] ----- is held to the earth by gravity.  
air

[ESM343] About -----% of the total mass of the atmosphere is contained in  
troposphere  
80

[ESM343] ----- is caused by horizontal variations in air pressure  
wind

[ESM343] ----- varies in concentration in the atmosphere both spatially and  
temporally  
water vapour

[ESM343] ----- is any form of water that falls from the atmosphere and  
reaches the ground  
precipitation

[ESM343] ----- produces oxygen when carbon dioxide and water are  
chemically converted into glucose with the help of sunlight  
Photosynthesis
