

troposphere, stratosphere, mesosphere, and -----
thermosphere

[ESM343] ----- is the fifth most abundant gas in the atmosphere
Carbon dioxide

[ESM343] ----- is an instrument that measures humidity
sundial

[ESM343] Since 1750, methane concentrations in the atmosphere have increased by
more than ----- %
150

[ESM343] ----- is held to the earth by gravity.
air

[ESM343] About -----% of the total mass of the atmosphere is contained in
troposphere
80

[ESM343] ----- is caused by horizontal variations in air pressure
wind

[ESM343] ----- varies in concentration in the atmosphere both spatially and
temporally
water vapour

[ESM343] ----- is any form of water that falls from the atmosphere and
reaches the ground
precipitation

[ESM343] ----- produces oxygen when carbon dioxide and water are
chemically converted into glucose with the help of sunlight
Photosynthesis
