properties of the medium

[PHY306] Which of the following will remain unchanged when a sound wwave travels in water frequency

[PHY306] The frequency which is not audible to human ear is 50000 Hz

[PHY306] Sound waves are longitudinal

[PHY306] The physical quantity, which oscillates in most waves is amplitude

[PHY306] The time period of a vibrating body is 0.05 s. The frequency of waves it emits is 20 Hz

[PHY306] Sound waves do not travel through vacuum

[PHY306] A sound source sends waves of 400 Hz. It produces waves of wavelenght 2. 5 m. The velocity of sound waves is 1000ms-1

[PHY306] Sound and light waves both obey the laws of reflection

[PHY306] A source of frequency of 500 Hz emits waves of wavelength 0.4 m, how long does the waves take to travel 600 m 3 s
