

heterotrophs

[SED221] In a food chain, producer is called what?  
autotrophs

[SED221] In what direction do energy flows in any ecosystem?  
infinitely

[SED221] Which of these organisms is likely to start a food chain in a terrestrial habitat?  
grass

[SED221] Which of these begins a food chain?  
producers

[SED221] What is the ultimate source of energy in an ecosystem?  
the sun

[SED221] Primary consumers are most likely to be?  
herbivores

[SED221] Which one of these illustrates a proper terrestrial food chain?  
grass- grasshopper- lizard- snake

[SED221] Which of these organisms is likely to start a food chain in an aquatic habitat?  
Water lily

[SED221] As we move down the food chain, energy\_\_\_\_\_  
decreases
