

craters are believed to have formed on the moon is the
Late heavy bombardment

[SED312] Solar Nebula can be described as
a disk shaped mass of dust and gas

[SED312] The large cloud of gas and dust around the sun within which the solar
system was formed is called
Accretion disc

[SED312] Ice delivered from comets, which augments condensed water vapor
produced the
oceans

[SED312] The geographical history of the earth can be based on one of the following
Geological time scale

[SED312] A system of chronological measurement based on the study of planet's rock
layers could be referred to as
Topography

[SED312] In the initial stages, the earth was molten as a result of extreme
volcanism

[SED312] In historical geology, Precambrian events includes three eons which are
Hadean, Archean and
Proterozoic

[SED312] The sequence of historical events are outlined by geologists using
stratigraphy and
paleontology

[SED312] The forming of the solar system occurred in the _____ eon in the
Precambrian events.
Hadean
