=====

1. The results of adding the joint probabilities in _____ and columns are known as marginal probabilities.

marginal

table

columns

--->> rows

2. There are _____ basic laws of probability.

five

ten

eight

--->> four

3. Assume there is a drug store with 10 antibiotic capsules of which 6 capsules are effective and 4 are defective. What is the probability of purchasing the effective capsules from the drug store?

0.99

--->> 0.252

0.613

1.764

4. There are basically _____ separate ways of calculating probability.

one

seven

--->> two

four

5. Joint probabilities can be _____ analysed with the aid of joint probability

bayes

marginal

inconveniently

--->> conveniently

6. _____ probability is often referred to as relative frequency.

--->> Empirical

Latitude

Longitude

Theoretical

7. A joint probability table is a _____ table.

possibility

inverse

--->> contingency

variables

8. A _____ probability implies the probability of joint events.

--->> joint

inverse

compound

review

9. The _____ Probability of an event is its simple probability of occurrence, given the sample space.

fixed

--->> Marginal

total
