

SLM305

=====

1. One of the followings is not an important role of soil organisms

fertility improvement

improved structur

--->> compaction

drainage

2. What is the percentage Nitogen content of the atmosphere

65

75

--->> 70

75

3. Earth worms thrive best under which type of condition of soil

dry soil

--->> moist soil

water logged soil

acid soil

4. Nematodes are mainly pathogenic to some crops

--->> True

False

none of the above

all of the above

5. Morphologically, true algae has the following features except one

chloroplast

cell wall

nucleus

6. Termite mounds contain higher amounts of the following soil nutrients except one

Mg

P

K

--->> Na

7. One of the following is not a beneficial role of soil bacteria

fertility improvement

disease causing

--->> drainage

structure

8. The following activities of soil organisms are beneficial to plants except one

--->> Disease causing

nutrient cycling

nitrogen fixation

soil aggregation

9. What is the optimum temperature (degrees centigrade) range for bacteria that are termed mesophiles

43-53

--->> 25-35

40-45

0-10

10. Under which soil condition is Nitrogen mostly lost
