

1. ... are just bundles of DNA

Chromosomes

2. The key steps involved in DNA extraction include the following except ..

flushing

3. Areas where Recombinant DNA have impact include

All of the above

4. A series of steps by which DNA is separated from the rest of the cellular components is known as ..

precipitation

5. The physical location of a gene is its ..

Locus

6. ... are molecules of DNA that are found in bacteria separate from the bacterial chromosome

Plasmids

7. An enzyme that cuts duplex DNA in the middle is known as ..

endonuclease

8. Gene mutations can be classified into ..

A and B

9. ... are small segments of a long molecule called DNA that is composed of four different nucleotides

Genes

10. DNA fragments of different sizes can be separated by an electrical field applied to a ..

gel
