

National Institute of Health

[BIO316] Protein Information Resource (PIR) was established by one of the following bodies

National Biomedical Research Foundation

[BIO316] One of the following is among the purpose of establishing Data Library by European Molecular Biology Laboratory
collecting, organizing and distributing data on nucleotide sequence and other information related to them

[BIO316] Macromolecular sequences was published under Atlas of Protein Sequence and Structure in the year
1965-1978

[BIO316] Protein Sequence and Structure was compiled as Atlas of Protein Sequence and Structure by
Dayhoff and co-workers in 1965

[BIO316] Atlas of Protein Sequence and Structure provide useful information in the field of
Computational biology

[BIO316] National Biomedical Research Foundation helps the scientists in identifying and interpreting the information of protein sequences

[BIO316] One of the following statements is incorrect about EST databases
They are generated by double-barrel gun sequencing method

[BIO316] The remarkable development in the field of bioinformatics in the year 1988 was
development of National Centre for Biotechnology Information

[BIO316] Data sequence library was established in 1980 by
European Molecular Biology Laboratory
