

called
Lymphoblasts.

[BIO318] Another type of lymphocyte cells that have receptors different from B and T lymphocytes are called
Natural killer cells

[BIO318] Helper T cells are recognised by expressing a surface protein called
CD4

[BIO318] The polymorphs of Myeloid Cells consist the following except
thrombocyte

[BIO318] The small portion of the macromolecule bound to immunoglobulin molecule is called
Epitope

[BIO318] The following are the principal components of the immune system except are
Mast Shell

[BIO318] Cells derived from the bone marrow migrate to the thymus where they mature are known as.
T lymphocytes

[BIO318] Antigens are substances capable of reacting with
T cells

[BIO318] Cow Pox is a viral disease also known as
vaccinia

[BIO318] Which of the Myeloid Cells contain electron dense granules in their cytoplasm and differentiate in the tissues.
Mast Shell
