

Large

[ECO726] Which of the following is correct about a large sample size?  
t-distribution is symmetric

[ECO726] All the followings are types of non-probability Sampling Except  
Simple Sampling

[ECO726] One of the followings is a good property of point Estimation  
Efficiency

[ECO726] Which of the following methods is most suitable for estimating the regression coefficients ?  
Least Square Method

[ECO726] The degree of confidence for an interval estimate are  
90, 95, 99

[ECO726] If an estimator has its mean of sampling distribution equal its population characteristics, the estimator is said to be  
Unbias

[ECO726] A sample size (n) is regarded as small if  
 $n < 30$

[ECO726] The process of drawing conclusions based on analysis of sample is called  
statistical inference

[ECO726] The study of the relationship between a sample and the population from which the sample is drawn is called  
sampling theory
