

Which of these is an unsaturated fatty acid _____
Oleic acid

The breakdown of large molecules to smaller molecules in the living system of organisms is called _____
Catabolism

A condition of decrease in the pH of blood plasma is called _____
Acidosis

_____ and _____ are the proteins that make up the biological membrane
Simple and Conjugated

DNA differs from RNA because of the presence of _____ nitrogenous base in DNA but absent in RNA
Thymine

Which of these makes lipids different from carbohydrates _____
Lipids can supply higher amount of energy than carbohydrate

Which of these vitamins can act as a co-enzyme _____
Vitamin K

The cell organelle where electron transport chain takes place is _____
Mitochondrion

Cytosol
Cytoplasm

The branch of biochemistry that studies the adverse effects of foreign substances on living organisms is _____
Toxicology
