

CIT333

=====

1. site implementation details should include information on the following except?

procedures

--->> plan

schedule

team

2. what type of error prevents the system from fully satisfying its usage?

--->> critical error

non critical error

unknown error

known error

3. the testing method where the tester has the privilege to the internal data structures and algorithms is called?

Black box testing

grey box testing

--->> white box testing

dark box testing

4. one of the following is not an examples of Major Tasks in Implementation

Performing site surveys before implementation

Providing all needed technical assistance

Providing appropriate training for personnel

--->> providing computer system

5. the type of requirement that describes the site-specific physical facilities required during the system implementation period is called?

Practice E-exams & Chat with course mates on [noungeeks.net](https://www.noungeeks.com)

hardware requirement

--->> facilities requirement

data requirement

6. Major Requirement in Implementation process include?

security

implementation support

personnel

--->> all of the options

7. HIPO technique helps designers to evaluate and refine a program's design, and correct flaws prior to implementation. What is HIPO?

High level plus Input-Processing-Output

Hierarchy plus Input-Processing-Output

--->> Hierarchy plus Input-Process-Output

High level plus Input-Process-Output

8. which of these is not part of Natasha Baker's "Key Concepts of Six Sigma?"

--->> plan

analyze

measure

analyze

9. the error whose occurrence does not notably affect the system's expected quality is called?

critical error

--->> non critical error

unknown error
